Data Pipeline Study Project

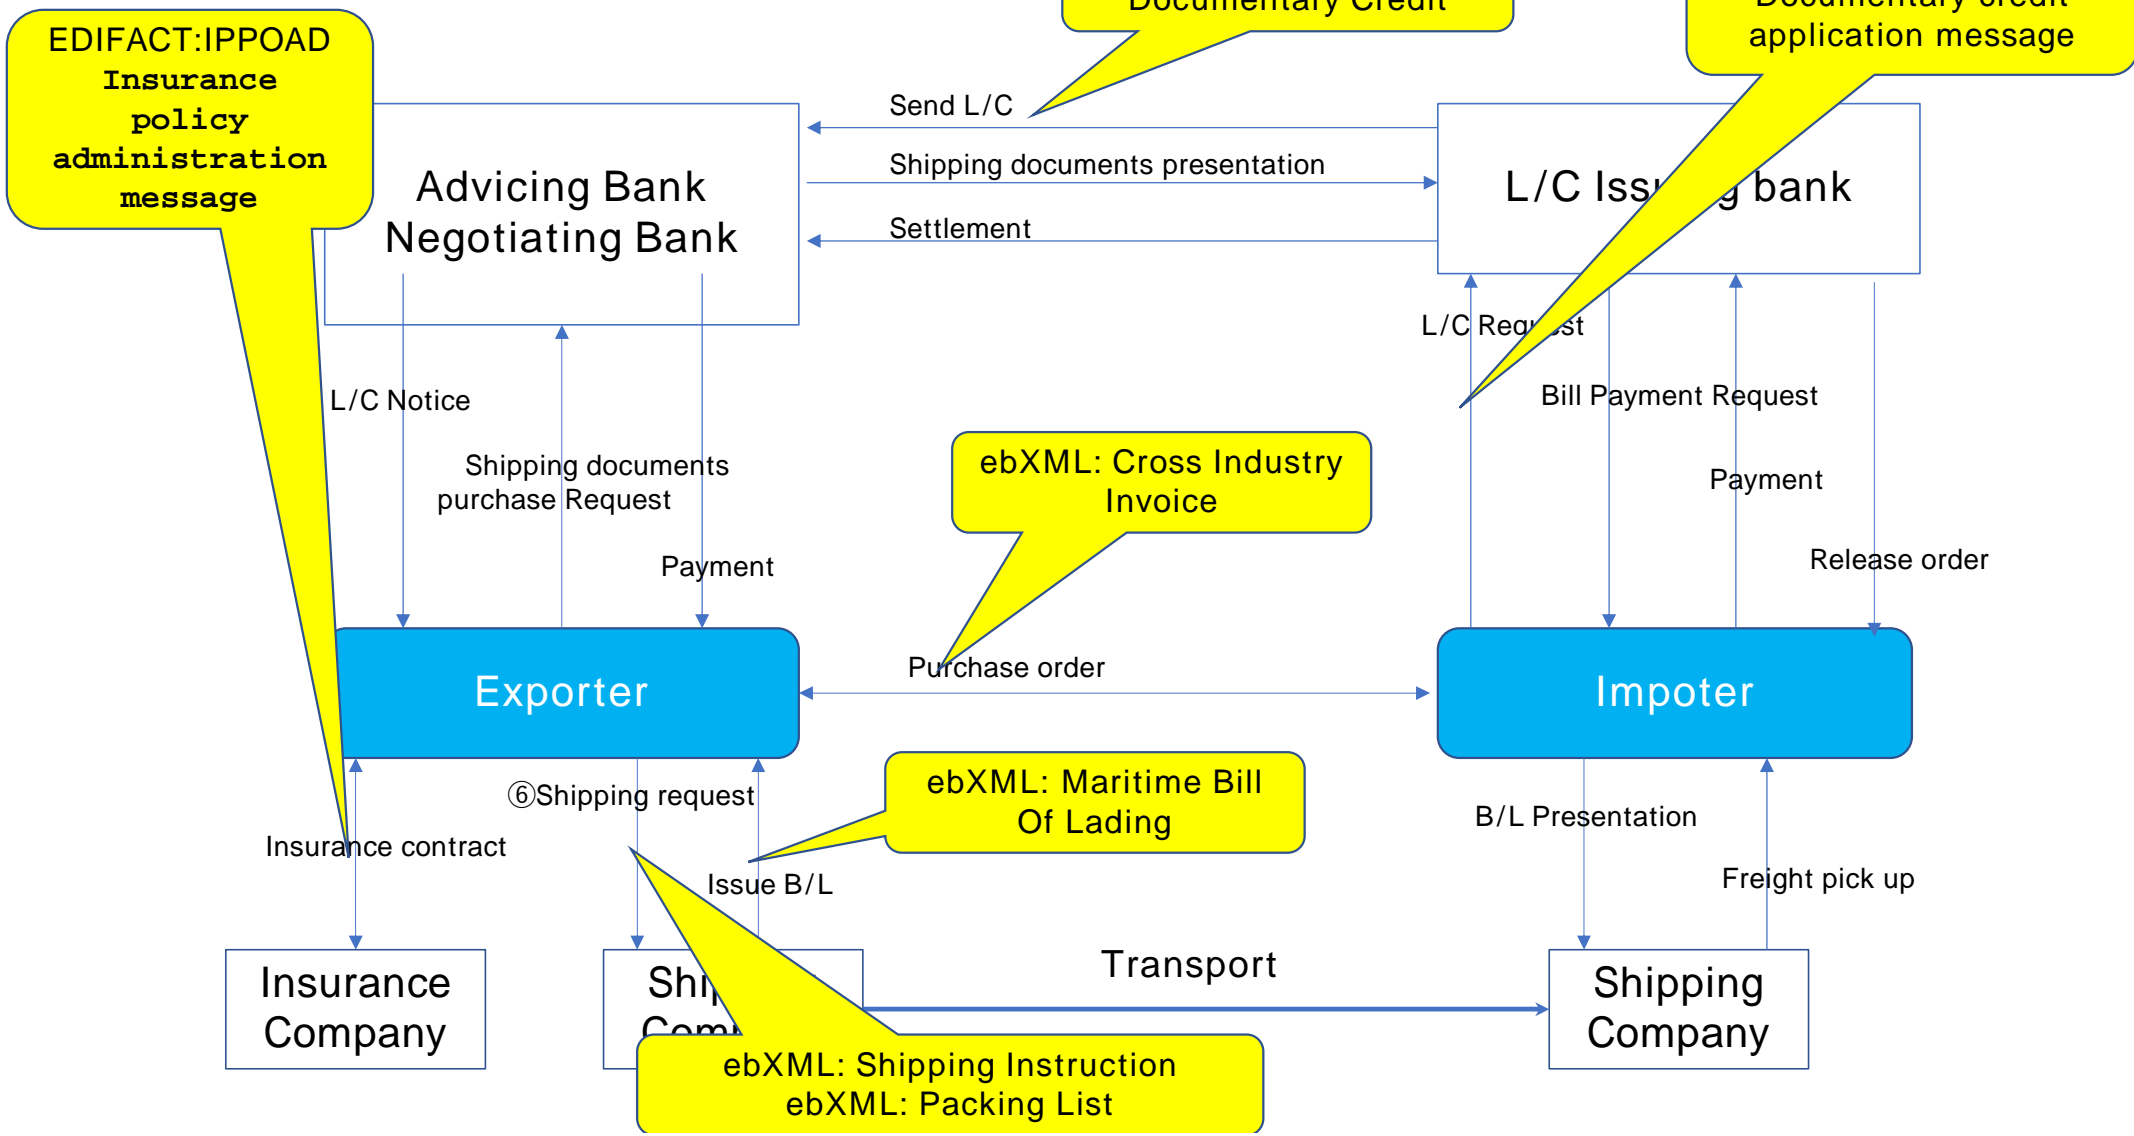

https://unece.org/fileadmin/DAM/cefact/GuidanceMaterials/WhitePaperDataPipeline_Eng.pdf

11 JUL. 2023
AFACT Mid Term meeting

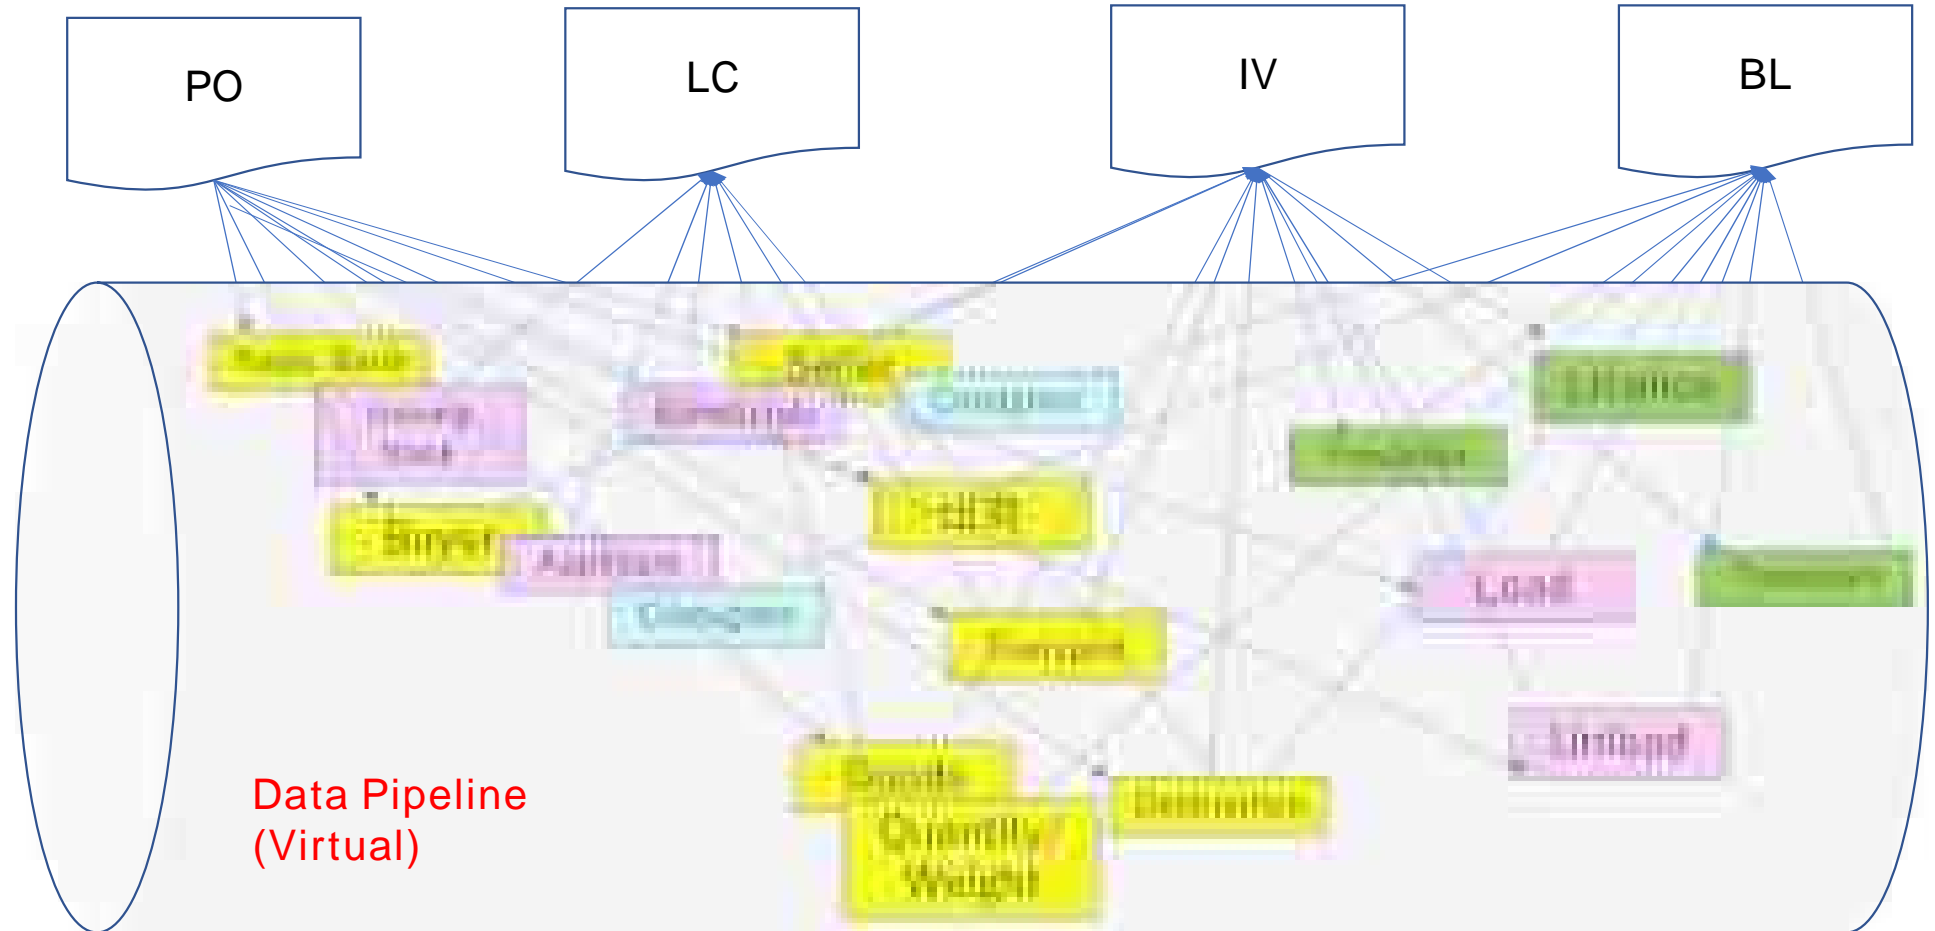

UN/CEFACT Data Pipeline Concept

Target domain: Trade Facilitation

Share data

Domain		Platform (Example)					
B to B	Commerce	< Japan > JAFTAS (CoO for Automobile)	< Japa > Open21 systems (Steel Industry)	< Japan > ECALGA (Electronics)	< Japan > Chem eStandards (Chemical)		
	Financial	Trade Waltz	Infor Nexus	Marco Polo	Komgo	STAND AGE	
	Logistics	Colins (Japan)	CargoSmart	Bolero	Contour	E2Open	
		Cyberport (Japan)		Port net (Singapore)	CargoX	KL-NET (Korea)	
B to G	Regulatory	NACCS (Japan)	Thaila nd Custo ms	Malaysia Customs	Indonesia Customs	NTP (Singapore)	UNI-PASS (Korea)

Data Pipeline Study Project

Definition

The concept of a data pipeline allows data that originates at its source to be provided once and used multiple times throughout the supply chain, regardless of the mode of transport, party or border agency that needs to access the data.

Activities

- Specify Business Requirement for Data Pipeline in Asia
- Survey Trade Platforms in Asia
- Specify the governance of data sharing in Data Pipeline

Deliverables

- White paper : Data Pipeline for Asia and Pacific Region

Project Schedule
